

March 2007

As one of the world's leading research-based Pharmaceutical Companies, GlaxoSmithKline's reputation of innovation is respected throughout the industry. The Medicine Research Centre of Verona (Italy) is one of the major R&D centres worldwide dedicated to the discovery and development of new medicines.

We are looking for :

A BSc in Biological Sciences, DVM, or equivalent. Specialisation in Toxicology (MSc or equivalent). Proved experience as a Study Director and Study Monitor of general toxicology studies. Knowledge of the drug development process and proved experience of working in project teams. Excellent analytical and leadership/organisational skills. Ability to contribute to a positive work environment, fostering teamwork and innovation. Strong interpersonal and written communication skills. Fluency in English (both written and spoken) is essential; fluency in Italian would be an advantage but is not essential. Ability to interact with multidisciplinary discovery and development teams to address drug-development needs.

GlaxoSmithKline is dedicated to workplace innovation and will support you with career-long opportunities and learning. We offer competitive benefits and compensation packages designed to attract and retain the very best. The remuneration is negotiable depending on experience.

Please either send a detailed cv with the indication of the reference above to E-mail address RS31502@gsk.com or apply to this opportunity visiting our website at www.gsk.com. REQ.N. 41070
